

We have an honour to invite you to the 8th International Symposium

„Architecture, Technology and Health” ATZ 2019
as part of the DREAM Silesia Multiconference
The Silesian University of Technology, Faculty of Architecture
5th-6th April 2019, Gliwice

So far the subject matter of the Architecture, Technology and Health Symposiums has been concerned with architectural, construction and urban solutions in respect of public health and quality of life.

We would like to suggest that the discussion at the next edition of ATZ should focus on the spatial and technological solutions in healthcare facilities. Our guest speakers will explore the subject of architectural solutions facilitating the process of diagnosis, treatment and rehabilitation as well as the quality of space in patient areas. The symposium is addressed to designers, medical technologists, administrators of health care facilities and doctors.

We would like to invite you to submit papers in the following subjects:

- designing health care facilities with patients' comfort and the importance of healing environment in mind,
- the role of modern medical technologies in the design of spatial solutions for hospitals.

ATZ 2019 is part of the **Design, Research Education in Architecture Multiconference (DREAM Silesia)**, organized by the Faculty of Architecture of the Silesian University of Technology, which also includes the following 4 conferences organized at the same time:

- Interdisciplinary Research in Architecture,
- Region - City – Village,
- Innovative Ideas in Architecture,
- Nature – Architecture – Culture.

The Multiconference is regarded to be a platform for exchanging various theoretical, practical and educational experiences. We hope that it will encourage the use of solutions that improve the efficiency of health care facilities and the quality of space in patient areas.

Klaudiusz Fross

Chairman of The DREAM Silesia Multi Conference
